# Experiment

This experiment will take 15-30 minutes. Thanks.

1. Please open nodule_me.

2. Please input l10.dcm in S40.

3. Please label 6 nodules in order by hand and save "a_yourname.json".

z-index is 128-133

z-index is 147-153

4. Please label 6 nodules by snake and save "b_yourname.json".

If snake miss labeling, please retry.

OK	NG (Please retry)	NG (Please retry)

Don't edit labels by PINSET tool now.

5. Please edit 6 nodules of b_yourname.json by hand and save "c_yourname.json"

6. Please send me a_yourname.json b_yourname.json and c_yourname.json. (you don't have to send .npy files.)
